

LiliPuti.[®]
MAMA COAT

Instructions for Use

Using the Babywearing Insert

Apply the babywearing insert BEFORE wearing the coat. How to apply the insert? It is very easy! For **front carry** you only need to zip one side of the insert into the Liliputi Mama Coat front zip. (pic 1.)

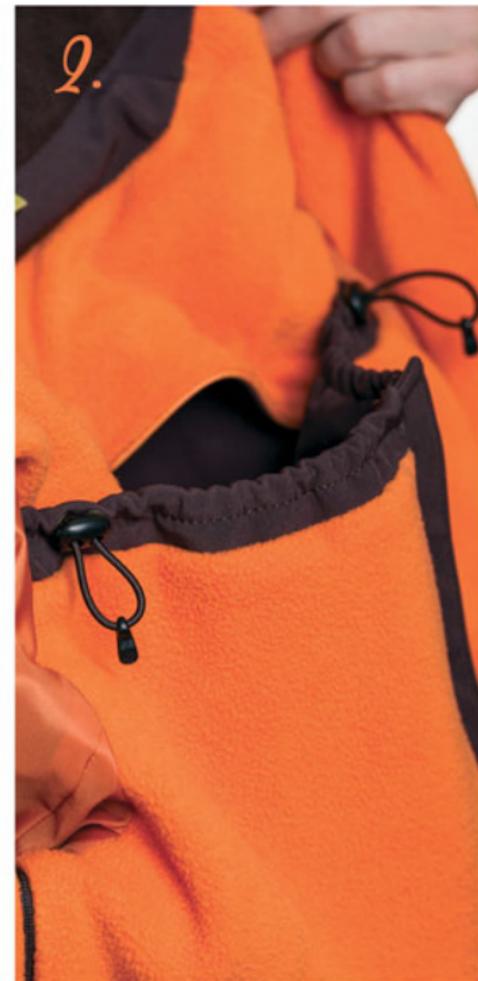

And how to use the insert for **back carry**? This might look difficult but with a little practice it is really easy. Open the zip in the back of the coat and zip the babywearing insert both side. (pic 2.) Open as many snaps out of 6 as needed to fit your baby comfortably in. Make sure that it is neither too tight nor too loose.

Wearing and Adjusting the Coat

For **front carry**, first put your baby in a suitable baby carrier in upright position, then put the coat on. Zip the other side up and adjust the size with the 3 cords (pic 1.)

For **back carry** swing the coat to your back in a way that your baby's head goes through the hole that the babywearing insert leaves in the back of the coat. Then zip them up. There is another way to put it on. Hold the coat in front of you from the upper part with the inside facing out. Flip the jacket over you and your baby. Put your arms in the sleeves and let your baby's head pass through the back hole. Adjust the size with the 3 cords (pic 1.) and also you can adjust the opening of the back panel of the coat from the inside (pic 2.)

Taking the Coat off

Taking off a babywearing coat while wearing your baby in your back may become a tedious task. That is why the Liliputi Mama Coat has this practical underarm zippers. They allow you to move easier when you take the coat off (or even could be helpful when putting it on). You won't need much time to get use to it as with a little practice it turns into routine.

The under armpit-zip has another great feature. It ventilates the air and cools off the coat and its wearers when needed.

...Some Other Adjustments

This detachable **hood** provides you with the perfect protection against the elements, and can be easily adjusted to your size just by pulling and locking its cord (pic 1.) You can easily detach it while not in use. This is a great advantage while carrying on the back, so that the hood will not bother your baby!

You will find another great feature at the bottom of the coat for those days when is freezing cold. You can **tighten the bottom** with the help of an elastic cord and lock it making sure that the feet of your little one will be kept perfectly warm embraced by the coat and the heat of your body. (pic 2.)

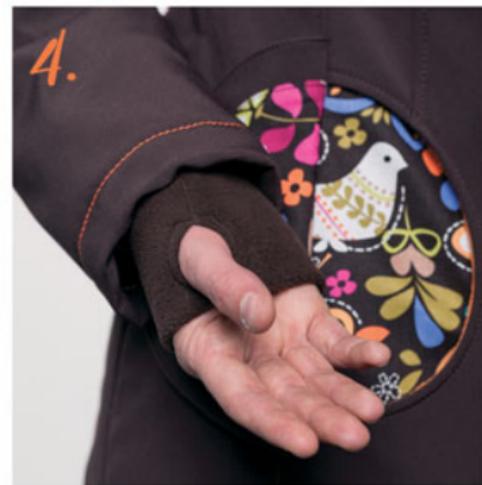

...and Some Other Features

Another way to personalize your Liliputi Mama Coat is by the special snaps that you can fix in 2 positions to cover the round pockets to match your mood or follow your needs. Open them and display its happy colours and patterns showing the real beauty of this coat that will cheer you up on gray winter days. Close them if you need a more discrete style, it will be appealing then with its solid elegance and clean lines. (pic 1-2.)

No need to worry from the cold, if you keep the pockets open, the thermo-fleece lining will keep your hands in a nice warmth. (pic 3.)

If it's not enough, the thermo wrist-warmer will keep your hands warm and free. Just wear it by looping your thumb through its hole to fix the fingerless mittens. (pic 4.)
